## Summary

I am a 3rd-year Software Engineering student and an active Software Developer specializing in mobile development. I have hands-on experience in building end-to-end solutions in Agentic AI (LangGraph), Fintech systems, and IoT solutions. I have achieved multiple first-place awards in hackathons as a team lead, demonstrating strong technical leadership, crisis management, and rapid product development skills. I actively manage my personal portfolio at **mbesirkesen.com** and mentor 20 junior students in academic and technical growth.

## Technical Skills

**AI & Backend:** LangGraph, LangChain, RAG Architecture, Agentic AI, FastAPI, Node.js, Express, Prisma ORM, Prompt Engineering

**Mobile & Frontend:** React Native, Next.js, Tailwind CSS, JavaScript (ES6+), TypeScript, CSS Grid System

**Database & Tools:** PostgreSQL (Neon), MongoDB Atlas, ChromaDB, Supabase, Docker, Git, **Portfolio Management**

**Communication & IoT:** ESP-NOW Protocol, MQTT, UDP/TCP, Embedded C++, Arduino, ESP8266, C#

## Experience

### Firat University Digital Transformation Office (DDYO)

Elazig, TR

*Part-time Mobile Developer*

Jan 2026 – Present

- Developing corporate mobile applications using **React Native** for university-wide digital transformation projects.

### Huawei Student Developers (HSD Firat)

Elazig, TR

*Core Team Member - Events & Sponsorship*

Sep 2025 – Present

- Coordinating corporate sponsorship negotiations, budget management, and organizing technical workshops for the community.
- Managing operational processes for events like "Basement Night CTF" to drive community engagement and growth.

### Dreamind - AI Dream Analysis App 📄

Google Play Store

*Backend & AI Engineer*

Dec 2025 – Mar 2026

- Architected an asynchronous backend using **FastAPI** and integrated Google Play **IAP** and subscription management systems.
- Implemented database security layers with **Supabase Auth** and **RLS** policies; managed complex data models with Neon PostgreSQL.
- Optimized Prompt Engineering workflows to transform LLM outputs into structured JSON data formats.

## Selected Projects

### AgeSA City (Gamified Finance Platform) 🏆 – CodeNight 1st Place

Feb 2026

- **Role: Frontend Developer.** Successfully completed the entire frontend dashboard architecture (City Builder, Financial Simulation) single-handedly following the sudden loss of a team member during the hackathon.
- Designed a gamified UX using JavaScript and CSS Grid, allowing users to build digital cities based on real-world financial savings.

### AI Recipe Chatbot (Agentic RAG) 🏆 – T3 CodeNight 1st Place

Mar 2026

- **Role: Team Lead & Backend Developer.** Developed an autonomous recipe assistant built on **FastAPI**, **LangChain**, and **ChromaDB**.
- Engineered a RAG system with vector database integration to provide personalized nutritional recommendations.

### AI Weather Assistant (Agentic AI) 🏆

2025

- **Role: Independent Developer.** Built an autonomous intent-based weather agent using **LangGraph** and **LangChain**.
- Integrated real-time API data with documentation-based **RAG** systems, providing advanced Memory Management and LangSmith tracing.

### KOZALAK (IoT Wildfire Early Warning System)

2025

- **Role: Full-Stack & Embedded Developer.** Designed an original mesh network architecture for low-power communication in remote areas.
- Utilized **ESP-NOW** protocol for sensor-to-sensor data transmission and integrated an **MQTT** gateway for cloud synchronization.

## Awards & Achievements
